The diagram illustrates the mapping of feature types from a source schema to a target schema. The source schema (left) contains three feature types: **Treatment**, **ConservationArea**, and **ArchaeologicalSite**. The target schema (right) contains three feature types: **ConservationArea**, **ArchaeologicalSite**, and a new feature type **ArchaeologicalSiteWithBorehole**. The mapping is as follows:

- Treatment** (source) maps to **ConservationArea** (target).
- ConservationArea** (source) maps to **ConservationArea** (target).
- ArchaeologicalSite** (source) maps to **ArchaeologicalSite** (target).
- A new feature type **ArchaeologicalSiteWithBorehole** is added to the target schema.

The feature types are defined as follows:

Source Schema Feature Types:

- Treatment**
 - species: CharacterString [0..1]
 - treasurePreservationOrder: Boolean = true
- ConservationArea**
 - designationPurpose: DesignationPurposeValue [0..1]
- ArchaeologicalSite**
